**C&S Vending Announces Food Delivery Services to Aid Essential Workers**

C&S Vending Company, Inc. has announced increased services in the greater Minneapolis and St. Paul area to support essential businesses during the COVID-19 outbreak. The company will use their in-house catering facility to create large quantities of individually wrapped food items for distribution to multiple industries and government entities.

A variety of products will be delivered to EMS, nursing homes, hospitals, the National Guard, and other essential businesses. BoxLunch programs are also available to satisfy demand. The new food delivery program has been developed to ensure employees remain on-site during their work day to limit exposure to the Coronavirus.

C&S employees self-report on their health every day, follow strict hand washing and hygiene standards, and adhere to heightened food safety protocols. Route drivers wear new, sanitary gloves on their hands with each delivery. Food deliveries can be arranged immediately.
