# QuarkXPress 6.5

## QuarkXPress - Export to PDF (export preset settings)

Exporting directly to a PDF file from QuarkXPress is a good feature if the document size is the same as the trim. If the document is a different size than the trim, you will have to create a postscript file with the correct page size and then distill to a PDF file. Minnesota Newspaper Association recommends these settings as a guide. As always, contact your prepress department of your printer if you have any questions regarding settings or page sizes.
